REACT NATIVE ENGINEER

React Native Engineer leading cross-platform mobile development for financial services and telecommunications clients. Senior-level professional with a track record delivering high-impact features such as a multi-tenant payment workflow and an automated build-and-release framework that reduced release time by 30%. Proven ability to drive performance optimization, CI/CD implementation, and cross-functional collaboration. Seeking to leverage deep mobile expertise to accelerate product innovation and enhance user satisfaction.

WORK EXPERIENCE

Tech Consulting

React Native Consultant

Texas, USA · Jan 2025 - Present

Worked as a React Native Consultant for different clients

React Native Developer (Client: Toyota Financial Services)

Texas, USA · Nov 2025 - Present

- Maintained and enhanced a shared React Native codebase supporting multiple financial-services brands, ensuring consistent functionality while accommodating brand-specific business requirements.
- Implemented payment, collections, and loss-mitigation features in React Native using Firebase and React Navigation, enabling faster transaction processing and reducing error rates for end users
- Developed a Bash-based build and deployment automation framework that automated version increments, multi-tenant APK/IPA generation, artifact management, Sauce Labs uploads, and source-control updates, reducing repetitive manual release activities and improving deployment consistency.
- Collaborated with product owners, UX designers, QA engineers, and backend teams through Agile ceremonies and Git to deliver customer-facing enhancements that increased feature adoption and improved overall usability
- Improved application responsiveness across multiple device types, reducing UI inconsistencies and enhancing user experience.
- Integrate Adobe Analytics and release new React Native features using React Navigation and Git in an Agile team, improving data insights and app stability

React Native Team Lead (Client: Frontier Communications)

Texas, USA · Jul 2025 - Nov 2025

- Lead a team of 5 developers using Agile sprints and CI/CD pipelines to deliver React Native features and UI enhancements, resulting in faster release cycles and higher client satisfaction
- Improve app performance by implementing lazy loading, optimized rendering, and fallback handling, which reduces load times and makes the app feel more responsive to users
- Used Firebase for real-time analytics, Logstash for log aggregation, and Quantum Metric to monitor production, which enabled quicker issue detection and faster resolution of performance problems
- Work with stakeholders in sprint planning and backlog grooming to prioritize mobile features, delivering functionality that meets user needs and increases engagement
- Support release activities through automated CI/CD pipelines and quality checks, enhancing application stability and delivering a smoother user experience

Bright Mind Enrichment (BME)

React Developer (Volunteer)

New Jersey, USA · Nov 2024 - Jan 2025

- Collaborated with a Scrum team of 4 developers using Git and GitHub Actions to deliver feature updates for the Bright Mind Enrichment website, enabling more timely releases and smoother deployments
- Designed and implemented UI components for seasonal campaigns, including a 'Self-Care & Wellness' initiative, enhancing user engagement during key organizational events.
- Mentored team members on code quality and React best practices, fostering a culture of continuous improvement.

Insignia Consultancy Solutions

Python Developer

New Jersey, USA · Aug 2024 - Nov 2024

- Developed an AI-powered chatbot that generated text, converted speech to text, and produced speech output using local and cloud LLMs such as Ollama, Groq, and Hugging Face, improving user interaction with the platform
- Designed and implemented an NLP-based information extraction system to identify key entities and intents from user input (e.g., source, destination, travel dates), transforming free-form text into structured, high-level action items for AI workflows.
- Designed and implemented high-performance REST APIs using Flask, optimizing request handling and reducing response times by 20%.

Webtraffic Agency

Graphic Designer

Mumbai, India · Jan 2022 - Jun 2022

- Collaborated with cross-functional teams to create brand-consistent visual assets, strengthening overall brand identity.
- Managed multiple client projects concurrently, delivering 100% on-time completion while maintaining quality standards.
- Produced social media graphics and campaign creatives, boosting post engagement by 60%.
